

200-VRT-1011

These 1" (25mm) vertical knives are our longest wearing openers. The high chrome cast tip has a double carbide insert that protects the bottom 2" (50mm) of the tip. Because of the near vertical approach, this opener will pull harder than conventional knives, however it will throw less soil and pull out fewer rocks.

Driver 200-DRV-1030 should be used to protect the tip when installing this knife.

Product Number : 200-VRT-1011
Type of operation: Seeding
Shank Type : 200 Series adapter
Bolt-On or Speed-Loc : Speed-Loc
Seeding: Single-Shoot
