

410-QCA-5010
SPEED-LOC ADAPTER

This heavy duty Speed-Loc™ adapter fits all chisel plow 50° shanks except the Bourgault, the Morris Magnum III and the LH 755 shank on the Morris Concept 2000. The bottom bolt hole is slotted to fit 1-3/4 inch to 3 inch (45 mm to 77 mm) bolt spacing and it is mounted on the shank with 1/2 inch (12 mm) hex head bolts.

This adapter can be used on most 43° shanks by adding a 7° wedge, part number 400-WDG-0700 between the adapter and the shank.

Special note for John Deere: Certain John Deere chisel plow models including the 685, 1810, 1820 & 2400 may need a 3° wedge part number 400-WDG-0300, to attain proper sweep pitch with this adapter.

Owners of Australian manufactured Field Cultivators, Chisel Plows and Air Hoe Drills may look up the required quick change adapters in the "*Speed-loc™ Reference Guide*".
